

Team Contributions: POC Software Engineering

Team #11, OKKM Insights
Mathew Petronilho
Oleg Glotov
Kyle McMaster
Kartik Chaudhari

This document summarizes the contributions of each team member up to the POC Demo. The time period of interest is the time between the beginning of the term and the POC demo.

1 Demo Plans

See section 9 of Development plan found [here](#).

2 Team Meeting Attendance

Student	Meetings
Total	8
Kartik	7
Kyle	8
Mathew	8
Oleg	6

Kartik was available for one of his missed meeting but there were some wifi issues in the thode building where our room was booked. Decided to go through meeting notes in the teams chat.

3 Supervisor/Stakeholder Meeting Attendance

Student	Meetings
Total	1
Kartik	1
Kyle	1
Mathew	1
Oleg	1

4 Lecture Attendance

Student	Lectures
Total	10
Kartik	9
Kyle	9
Mathew	9
Oleg	8

5 TA Document Discussion Attendance

Student	Lectures
Total	3
Kartik	2
Kyle	3
Mathew	3
Oleg	3

Kartik let the team know well in advance about his different meeting (clash) and made sure the message was conveyed through one of the teammates. He let the TA know himself as well in the next tutorial meeting.

6 Commits

Student	Commits	Percent
Total	252	100%
Kartik	54	21%
Kyle	140	56 %
Mathew	39	15%
Oleg	19	8%

Kyle's commits are inflated by his work on setting up CD/CI for building latex documents. To get it working, he made 74 commits to main to test building a new PDF document. With these commits removed, this is the new table:

Oleg's commit count is low due to his preference for working in a word processor before transferring completed sections to LaTeX. Most assigned issues were completed in one go, with reviews conducted outside of GitHub's infrastructure. Additional commits result from review feedback or self-corrected typos.

Student	Commits	Percent
Total	178	100%
Kartik	54	30%
Kyle	66	37%
Mathew	39	22%
Oleg	19	11%

7 Issue Tracker

Student	Authored (O+C)	Assigned (C only)
Total	102	80
Kartik	0	7
Kyle	57	25
Mathew	15	11
Oleg	13	14

The number of issues assigned to Kartik might look less but this was because he took up other responsibilities one being doing the reflections for the documents. Kyle was the only team member to create and assign issues during the first

deliverable. This was prior to completing our team git protocol, so other team members did not create issues and therefore Kyle has 8 additional issues created.

8 CICD

See section 7.2 of development plan found [here](#).
